

## 1. Introduction

### 1.1 Project Summary

Servento is Asia's largest online home services platform. Launched in 2014, Servento Company today operates in India. The platform helps customers book reliable high-quality services— to take care of all your home and beauty ,kitchen cleaning ,electrician ,hair salon, plumber ,gardening delivered by trained professionals conveniently at home . Servento Company & vision is to empower millions of professionals worldwide to deliver services at home like never experienced before. The Company raised Series F funding of USD 255 million in April 2021. The Series round was led by new investors .

This existing system of buying services has several disadvantages. It requires lots of time to travel to the particular place to buy the services. Since everyone is leading busy life now a days, time means a lot to everyone. Also, there are expenses for travelling from house to place. More over the place from where we would like to buy something may not be open 24\*7\*365. Hence, we have to adjust our time with the shopkeeper's time or vendor's time.

In order to overcome these, we have e-commerce solution, i.e., one place where we can get all required goods/products online. The proposed system helps in building a website to buy, sell products or goods online using internet connection. Purchasing of goods online, user can choose different products based on categories, online payments, delivery services and hence covering the disadvantages of the existing system and making the buying easier and helping the vendors to reach wider market.

## 1.2 Project Technical Profile

<b>Project Title:</b>	SERVENTO
Definition :	Online service is a form of electronic commerce which allows consumers to directly buy services from a seller over the Internet using a web browser .
Developed For :	S.D. J. International College, Vesu , Surat
Project Guide(s):	Prof. Poonam Patel
Front End:	HTML, JAVASCRIPT,CSS, AJAX, JQUERY
Back End :	MS – SQLSERVER
Scripting language :	C#
Operating System:	Microsoft Windows 10 , Microsoft Windows 11
Software:	Visual Studio 2010, MS – SQLSERVER 2008
Browsers:	Google Chrome, Internet Explorer, Mozilla Firefox
Processor:	11th Gen Intel(R) Core(TM) i5-1135G7 @ 2.40GHz 2.42 GHz
RAM:	8.00 GB
Hard Disk:	512 SSD
System Type:	64 – bit Operating System, x64 – based Processor
Tools used for ERD & DFD :	Draw.io
Submitted By :	1.Kapadia Mansi Shaileshkumar 2.Varaiya Ruju Shaileshkumar

## 2. Scope & Planning

### 2.1 Requirement Analysis

To develop any web application system, it is most important to identify the user requirement in very specific manner. Also, to function properly, all interfaces of proposed system with surrounding system must be identified. The correct system is that satisfied all users requirement. Therefore, it is very important to analyze the existing system and to document the software requirement specification for proposed system which in turn provides the base for development of the proposed system.

Our project guide conducted a series of lectures to impart us the required knowledge about the system. During the lectures, we also had question and answer session at the end, which helped us to have a clear idea about the Expected system.

#### **Fact Gathering Techniques:**

Fact –finding is the job of a person or group of persons in administrative proceedings that has or have the responsibility of determining the facts relevant to decide a controversy. The term trier of fact gathering denotes the same function the process is an extremely important part of the communication process.

They are:

- 1) Interviewing
- 2) Questionnaires
- 3) Records inspection
- 4) Observation

#### **Interviewing:**

- This method is used to collect the information from groups or individuals. Analyst selects the people who are related with system for the interview.
- In this method the analyst sits face to face with the people and records their responses.
- All basic requirements are conducted at this stage.
- It is a basic source of qualitative information.

### **Questionnaires:**

- It is the technique used to extract information from number of people. This method can be adopted and used only by a skilful analyst.
- The questionnaires consist of series of question framed together in logical manner
- In this, we get all information related to student fees collects related information.
- Gathering some data.

### **Record Review:**

- Records review is used to revise all the requirements before implementation.
- Here we revise all systems requirements like design & view of system facilities ,policies , terms & condition ,time-duration and all .
- Background reading or research is a part of the process.

### **Observation:**

- Unlike the other fact-finding techniques, in this method the analyst himself vis- it's the organization and observe and understand the flow of documents, working of existing System, the user of the system.
- At this stage, we consider all design & data related information like how to shows our form, which kind of interface gives to user & going with all this.

### **Conclusion of fact-finding technique:**

- I am using observation technique.
- I use all above for technique to find and gathering information related to system

### **Functional requirement (Admin):**

- Admin manage facility for insert, update, and delete category.
- Admin can also manage verification process of vendor who registers.
- Admin manage facility for insert, update and delete service.
- Admin manage facility for insert, update and delete Video.
- Admin manage facility for insert, update and delete Article.
- Admin can Manage product category of products , invoice of orders.
- Admin can manage vendor , staff ,user details like id, email id, photo etc.
- Admin can also add and remove vendor , staff , user.
- Admin can show the users details, Total number of order and total amount .
- Admin can manage the report.

### **Functional requirement (User):**

- User can register to the Servento process system and log in it.
- User can forget password.
- Forgot password will change password by just entering valid email id and provide link of change the password in mail.
- User can click remember buttons in day often not entre email id and password to login website .
- If any inquiry or details are required then the user can also contact Vendor regarding Particular service.
- User can get Response for his Query from Admin.
- User can also check product Details on the website who uploaded by admin.
- User can add the products on cart which he/she will be buy service .
- User can see the service .
- User can also have right to cancel order.
- User ,which products are brought, can download invoice .
- User can view, insert, delete service add to cart ,add to Wishlist.
- User can see order view list.

### **Functional requirement (Vendor):**

- vendor manage facility for insert, update, and delete Sub category, and type.
- Vendor can also manage verification process of staff who registers.
- Vendor manage facility for insert, update and delete service.
- Vendor manage facility for insert, update and delete Video.
- Vendor manage facility for insert, update and delete Article.
- Vendor can Manage product category of products , invoice of orders.
- Vendor can manage vendor , staff details like id, email id, photo etc.
- Vendor can also add and remove vendor , staff .
- Vendor can show the users details, Total number of order and total amount
- Vendor can register to the Servento process system and log in it.
- Vendor can forget password.
- Vendor Assign Staff.

## 2.2 Technology Details

### Software Requirements and Hardware Requirement

<b>Hardware Configuration</b>	
<b>Processor</b>	11th Gen Intel(R) Core(TM) i5-1135G7 @ 2.40GHz 2.42 GHz
<b>RAM</b>	8.00 GB
<b>Hard Disk</b>	512 SSD
<b>System Type</b>	64 – bit Operating System, x64 – based Processor
<b>Operating System</b>	Window 10 or Windows 11

### Technologies Used

<b>Software Configuration</b>	
<b>Software</b>	Visual Studio 2010, MS – SQLSERVER 2008
<b>Front – End</b>	CSS, HTML, JAVASCRIPT, AJAX, BOOTSTRAP
<b>Back – End</b>	MS – SQLSERVER
<b>Other Tools</b>	ASP.NET – VB.NET
<b>Browsers</b>	Google Chrome, Internet Explorer, Mozilla Firefox

## 2.3 Enhancement

- We can add job listing feature in Servento. So that we can recruit candidate directly from the website .
- We can add more services like painter category.
- We can add live chatting feature.
- We can add working time of service in website.
- We can add SMS feature for verification purpose or provide choice of WhatsApp, SMS or mail for verification purpose.
- We can make the service available worldwide.

## 2.4 Time chart

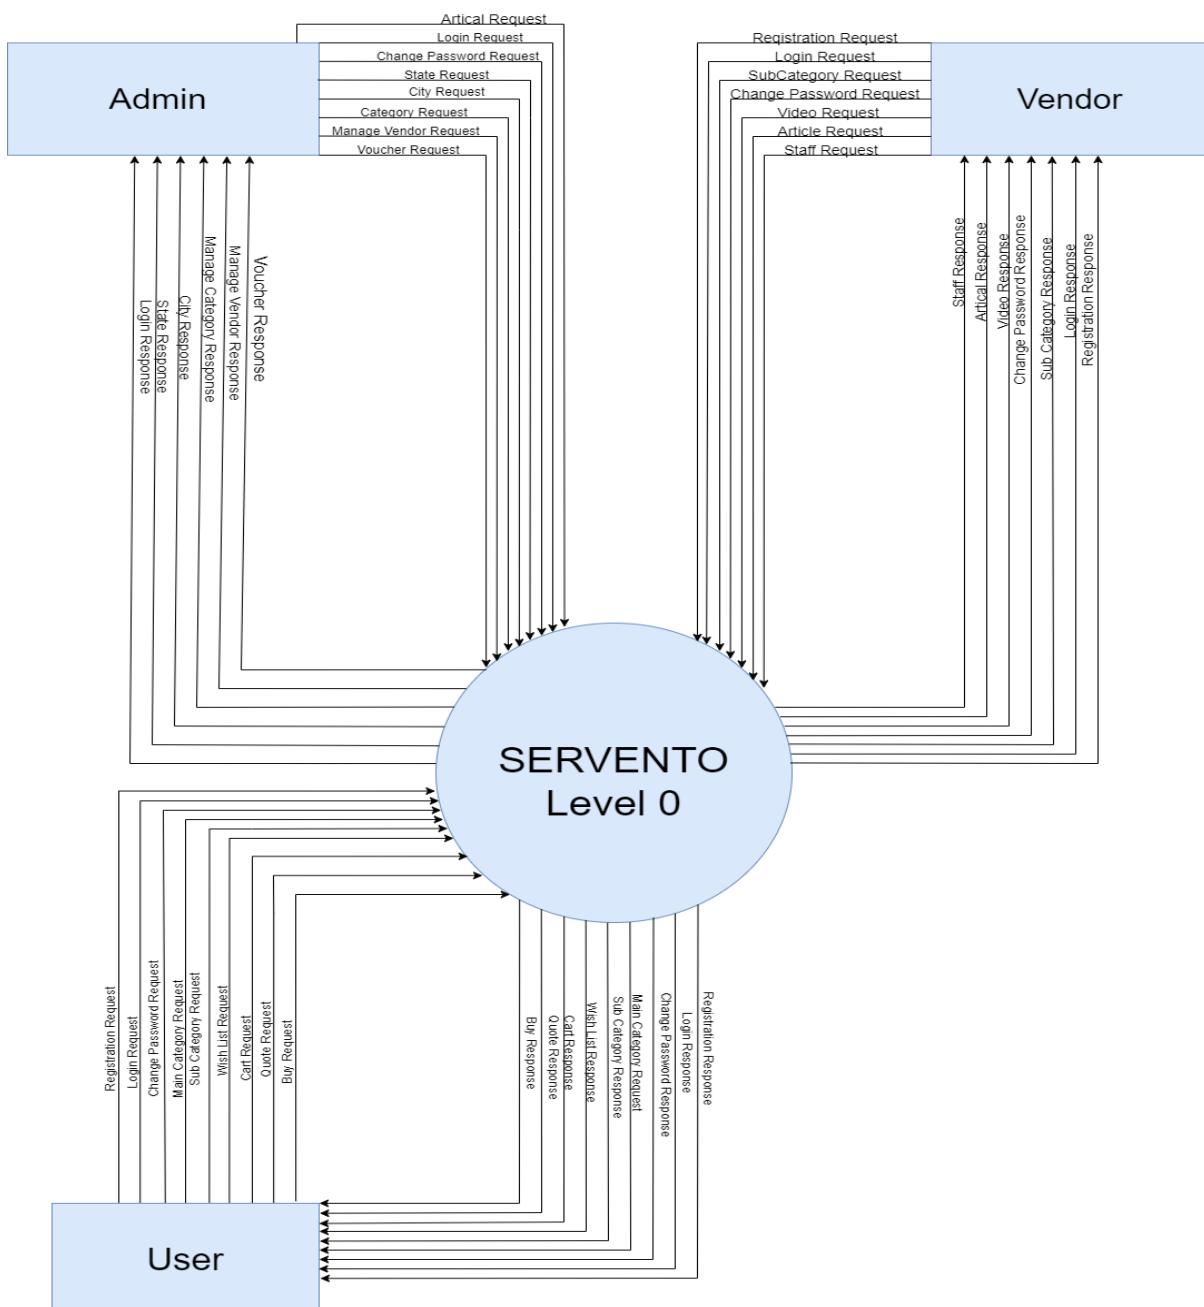

When Scheduling of a software project is done. The planner begins with a set of tasks to be performed. It automated tools are used; the work breakdown is input as a task network or task outline. Effort, duration and start date are then input for each task. In addition, tasks may be assigned to specific individuals.

Work Tasks	Month	Dec		Jan				Feb				Mar			
	Week	3	4	1	2	3	4	1	2	3	4	1	2	3	4

### 3.4 Database Design

#### Table Name : Admin\_mstr

Description :This table is giving details about Admin information.

Field Name	Field Type	Constraint	Description
<b>aid</b>	Identity	Primary Key	Id
<b>amail</b>	nvarchar(50)	Not Null	Mail Of Admin
<b>apass</b>	nvarchar(50)	Not Null	Password Of Admin

#### Table Name : Article\_mstr

Description :This table is giving details about Article information.

Field Name	Field Type	Constraint	Description
<b>anid</b>	AutoIncrement	PrimaryKey	Id of Article
<b>Image</b>	nvarchar(max)	Not Null	Article Of image
<b>postby</b>	nvarchar(50)	Not Null	Postby Article
<b>title</b>	nvarchar(max)	Not Null	Title Of Article
<b>adesc</b>	nvarchar(max)	Not Null	Description Of Article

#### Table Name : Assign\_Staff

Description :This table is give details about Article information.

Field Name	Field Type	Constraint	Description
<b>assign_id</b>	AutoIncrement	PrimaryKey	Id of assign staff
<b>ordid</b>	Int	Not Null	Id of orderid
<b>staffid</b>	Int	Not Null	Id of staff id
<b>date</b>	nvarchar(50)	Not Null	Date Of Assign staff

#### Table Name : Booking\_mstr

Description :This table is give details about Booking information.

Field Name	Field Type	Constraint	Description
<b>bid</b>	AutoIncrement	PrimaryKey	Id of Booking
<b>uid</b>	Int	Not Null	Id of User
<b>date</b>	nvarchar(50)	Not Null	Date Of Booking
<b>address</b>	Nvarchar(max)	Not Null	AddressOfuser
<b>cat_id</b>	Int	Not Null	Id of Category
<b>sub_cat_id</b>	Int	Not Null	Id of SubCategory
<b>vid</b>	Int	Not Null	Id of Vendor
<b>status</b>	nvarchar(50)	Not Null	Status Of booking

**Table Name : Contact\_mstr**

Description :This table is give details about Contact information.

Field Name	Field Type	Constraint	Description
<b>cid</b>	AutoIncrement	PrimaryKey	Id of contact
<b>cname</b>	nvarchar(50)	Not Null	User name
<b>cmail</b>	nvarchar(50)	Not Null	User mail
<b>contact</b>	Numerice(18,0)	Not Null	User contact
<b>service</b>	nvarchar(50)	Not Null	User select serivce
<b>msg</b>	nvarchar(max)	Not Null	User msg

**Table Name : City\_mstr**

Description :This table is give details about City information.

Field Name	Field Type	Constraint	Description
<b>city_id</b>	AutoIncrement	PrimaryKey	Id of city
<b>sid</b>	nvarchar(50)	Not Null	Id of state
<b>City_name</b>	nvarchar(50)	Not Null	Name of city

**Table Name : Category\_mstr**

Description :This table is give details about category information.

Field Name	Field Type	Constraint	Description
<b>cat_Id</b>	AutoIncrement	PrimaryKey	Id of category
<b>cat_name</b>	nvarchar(50)	Not Null	Category name
<b>cat_desc</b>	nvarchar(max)	Not Null	Descriptioof category
<b>Cat_image</b>	nvarchar(50)	Not Null	Image of category

**Table Name : Cart\_mstr**

Description :This table is give details about cart information.

Field Name	Field Type	Constraint	Description
<b>cartId</b>	AutoIncrement	PrimaryKey	Id of cart
<b>uid</b>	int	Not Null	User id
<b>sub_cat_id</b>	int	Not Null	Id of sub category
<b>sub_cat_price</b>	int	Not Null	price of sub category

**Table Name : Order\_details\_mstr**

Description :This table is give details about Order details information.

Field Name	Field Type	Constraint	Description
<b>ordid</b>	AutoIncrement	PrimaryKey	Id of order details
<b>order_id</b>	int	Not Null	Id of order
<b>uid</b>	int	Not Null	Id of user
<b>sub_cat_id</b>	int	Not Null	Id of sub category
<b>sub_cat_price</b>	int	Not Null	Sub category price

**Table Name : Order\_mstr**

Description :This table is give details about Order information.

Field Name	Field Type	Constraint	Description
<b>order_id</b>	AutoIncrement	PrimaryKey	Id of order details
<b>user_id</b>	Nvarchar(max)	Not Null	Id of user
<b>tamt</b>	Numerice(18,0)	Not Null	Amount of user
<b>tdate</b>	Nvarchar(50)	Not Null	date
<b>status</b>	Nvarchar(50)	Not Null	Order status

**Table Name : Request\_mstr**

Description :This table is give details about Request information.

Field Name	Field Type	Constraint	Description
<b>rid</b>	AutoIncrement	PrimaryKey	Id of Request
<b>uid</b>	int	Not Null	Id of user
<b>Sub_cat_id</b>	int	Not Null	Id of Sub category
<b>message</b>	Nvarchar(max)	Not Null	message
<b>vid</b>	int	Not Null	Id of vendor id

**Table Name : Staff\_mstr**

Description :This table is give details about Staff information.

Field Name	Field Type	Constraint	Description
<b>staffid</b>	AutoIncrement	PrimaryKey	Id of staff id
<b>vid</b>	Int	Not Null	Id of vendor
<b>staffname</b>	nvarchar(50)	Not Null	Staffname
<b>dob</b>	nvarchar(50)	Not Null	Date of birth staff
<b>gender</b>	nvarchar(50)	Not Null	Gender staff
<b>adharcard</b>	nvarchar(50)	Not Null	Adharcard of staff
<b>address</b>	nvarchar(max)	Not Null	Address of staff
<b>state</b>	nvarchar(50)	Not Null	State Of staff
<b>city</b>	nvarchar(50)	Not Null	City Of staff
<b>mobno</b>	nvarchar(50)	Not Null	Contact Of staff
<b>profile</b>	nvarchar(max)	Not Null	Profile Of staff
<b>cat_Id</b>	nvarchar(50)	Not Null	Category Of id

**Table Name : State\_mstr**

Description :This table is give details about State information.

Field Name	Field Type	Constraint	Description
<b>sid</b>	AutoIncrement	PrimaryKey	Id of state
<b>sname</b>	nvarchar(50)	Not Null	Name of state

**Table Name : Sub\_Category**

Description :This table is give details about Sub category information.

Field Name	Field Type	Constraint	Description
<b>sub_cat_id</b>	AutoIncrement	PrimaryKey	Id of sub category
<b>cat_id</b>	Int	Not Null	Id of category
<b>sub_cat_name</b>	nvarchar(50)	Not Null	name of sub category
<b>sub_cat_desc</b>	nvarchar(max)	Not Null	Description of sub category
<b>sub_cat_price</b>	Int	Not Null	price of sub category
<b>sub_cat_img</b>	nvarchar(max)	Not Null	Image of sub category
<b>vid</b>	nvarchar(50)	Not Null	Vendor id

**Table Name : Testimonial\_mstr**

Description :This table is give details about Testimonial information.

Field Name	Field Type	Constraint	Description
<b>tid</b>	AutoIncrement	PrimaryKey	Id of testimonial
<b>uid</b>	int	Not Null	Id of user
<b>title</b>	Nvarchar(max)	Not Null	title of testimonial
<b>tdes</b>	Nvarchar(max)	Not Null	Testimonial description

**Table Name : User\_mstr**

Description :This table is give details about User information.

Field Name	Field Type	Constraint	Description
<b>uid</b>	AutoIncrement	PrimaryKey	Id of User
<b>uname</b>	Nvarchar(50)	Not Null	Name of user
<b>umail</b>	Nvarchar(50)	Not Null	Mail of user
<b>ucontact</b>	Decimal(18,0)	Not Null	Contact of user
<b>upass</b>	Nvarchar(50)	Not Null	password of user
<b>address</b>	Nvarchar(max)	Not Null	address of user
<b>state</b>	Nvarchar(50)	Not Null	state of user
<b>city</b>	Nvarchar(50)	Not Null	City of user
<b>otp</b>	int	Not Null	otp of user
<b>status</b>	Nvarchar(50)	Not Null	status of user

**Table Name : Vendor\_mstr**

Description :This table is give details about vendor information.

Field Name	Field Type	Constraint	Description
<b>vid</b>	AutoIncrement	PrimaryKey	Id of Vendor
<b>vfname</b>	Nvarchar(50)	Not Null	Name of vendor
<b>vlnam</b>	Nvarchar(50)	Not Null	LastName of vendor
<b>vmail</b>	Nvarchar(50)	Not Null	MAil of vendor
<b>vpass</b>	Nvarchar(50)	Not Null	password of Vendor
<b>vgender</b>	Nvarchar(50)	Not Null	gender of vendor
<b>vaddress</b>	Nvarchar(max)	Not Null	Address of vendor
<b>vcity</b>	Nvarchar(max)	Not Null	City of vendor
<b>vstate</b>	Nvarchar(max)	Not Null	state of vendor
<b>vcontact</b>	Numerice(18,0)	Not Null	Contact of vendor
<b>vprofile</b>	Nvarchar(50)	Not Null	Profile of vendor
<b>cat_Id</b>	Nvarchar(50)	Not Null	Category Of id
<b>vdesc</b>	Nvarchar(max)	Not Null	Description of vendor
<b>vstatus</b>	Nvarchar(50)	Not Null	Status of vendor

**Table Name : Video\_mstr**

Description :This table is give details about video information.

Field Name	Field Type	Constraint	Description
<b>video_id</b>	AutoIncrement	PrimaryKey	Id of Video
<b>vid</b>	int	Not Null	Id of Vendor
<b>sub_cat_id</b>	int	Not Null	Id of sub category
<b>vurl</b>	Nvarchar(max)	Not Null	Video of url
<b>vimage</b>	Nvarchar(max)	Not Null	Video of img

**Table Name : Voucher\_mstr**

Description :This table is give details about voucher information.

Field Name	Field Type	Constraint	Description
<b>voucher_id</b>	AutoIncrement	PrimaryKey	Id of Voucher
<b>voucher_name</b>	Nvarchar(50)	Not Null	name of Voucher
<b>min_amt</b>	int	Not Null	Minimum amt of Voucher
<b>discount</b>	int	Not Null	Discount of Voucher

**Table Name : Wish\_List\_mstr**

Description :This table is give details about WishList information.

Field Name	Field Type	Constraint	Description
<b>wid</b>	AutoIncrement	PrimaryKey	Id of wish list
<b>uid</b>	int	Not Null	id of user
<b>sub_cat_id</b>	int	Not Null	Id of sub category
<b>vid</b>	int	Not Null	Id of Vendor

### 3.4 Database Dictionary

#### Table Name : Admin\_mstr

Description :This table is give details about Admin information.

<b>Aid</b>	Admin id auto generate
<b>Amail</b>	Admin mail
<b>Apass</b>	Admin password

#### Table Name : Article\_mstr

Description :This table is give details about Article information.

<b>Anid</b>	Article Id Auto generate
<b>Image</b>	Article Image
<b>Postby</b>	Posted By Admin/Vendor
<b>Title</b>	Article title
<b>Adesc</b>	Article discription

<b>cname</b>	User name
<b>cmail</b>	User mail
<b>contact</b>	Contact number
<b>service</b>	Category
<b>Msg</b>	Message send by user

**Table Name : City\_mstr**

Description :This table is give details about City information.

<b>city_id</b>	City id Auto Generate
<b>Sid</b>	State id
<b>city_name</b>	City Name

**Table Name : Category\_mstr**

Description :This table is give details about category information.

<b>cat_Id</b>	Category id , Auto generate
<b>cat_name</b>	Category name
<b>cat_desc</b>	Category description
<b>cat_image</b>	Category Image

**Table Name : Cart\_mstr**

Description :This table is give details about cart information.

<b>cartId</b>	Cart id, auto generate
<b>uid</b>	User id
<b>sub_cat_id</b>	Sub category id
<b>sub_cat_price</b>	Sub category price

**Table Name : Order\_details\_mstr**

Description :This table is give details about Order details information.

<b>ordid</b>	Id of order details
<b>order_id</b>	Id of order
<b>uid</b>	Id of user
<b>sub_cat_id</b>	Id of sub category
<b>sub_cat_price</b>	Sub category price

**Table Name : Order\_mstr**

Description :This table is give details about Order information.

<b>order_id</b>	Id of order details
<b>user_id</b>	Id of user
<b>tamt</b>	Amount of user
<b>tdate</b>	date
<b>status</b>	Order status

**Table Name : Request\_mstr**

Description :This table is give details about Request information.

<b>Rid</b>	Request quote id auto generate
<b>Uid</b>	User id
<b>sub_cat_id</b>	Sub category id
<b>message</b>	Message send by user
<b>vid</b>	Vendor id

**Table Name : Staff\_mstr**

Description :This table is give details about Staff information.

<b>staffid</b>	Staff id auto generate
<b>vid</b>	Vendor id
<b>staffname</b>	Staff name
<b>dob</b>	Date of birth
<b>gender</b>	Gender of Staff
<b>adharcard</b>	Adharcard of staff
<b>address</b>	Address of staff
<b>state</b>	State of Staff
<b>city</b>	City of Staff
<b>mobno</b>	Mobile no. of staff
<b>profile</b>	Staff image
<b>cat_Id</b>	Category id

**Table Name : State\_mstr**

Description :This table is give details about State information.

<b>sid</b>	State id Auto generate
<b>sname</b>	State name

**Table Name : Sub\_Category**

Description :This table is give details about Sub category information.

<b>sub_cat_id</b>	Sub Category id Auto generate
<b>cat_id</b>	Category id
<b>sub_cat_name</b>	Sub category name
<b>sub_cat_desc</b>	Sub category description
<b>sub_cat_price</b>	Sub category price
<b>sub_cat_img</b>	Sub category image
<b>vid</b>	Vendor id

**Table Name : Testimonial\_mstr**

Description :This table is give details about Testimonial information.

<b>tid</b>	Testimonial Id , Auto generate
<b>uid</b>	User id
<b>title</b>	Title of testimonial
<b>tdesc</b>	Testimonial description

**Table Name : User\_mstr**

Description :This table is give details about User information.

<b>uid</b>	User id Auto Generate
<b>Uname</b>	User name
<b>Umail</b>	User mail
<b>Ucontact</b>	Ucontact
<b>Upass</b>	User password
<b>Address</b>	Address of user
<b>State</b>	State of user
<b>City</b>	City id from city_mstr table
<b>Otp</b>	To verify user
<b>Status</b>	Verification status

**Table Name : Vendor\_mstr**

Description :This table is give details about vendor information.

<b>vid</b>	Vendor id Auto generate
<b>vfname</b>	Vendor first name
<b>vlname</b>	Vendor last name
<b>vmail</b>	Vendor mail
<b>vpass</b>	Vendor password
<b>vgender</b>	Vendor gender
<b>vaddress</b>	Vendor address
<b>vcity</b>	Vendor City
<b>vstate</b>	Vendor status
<b>vcontact</b>	Vendor contact number
<b>vprofile</b>	Vendor profile
<b>cat_id</b>	Category id
<b>vdesc</b>	Vendor description
<b>vstatus</b>	Vendor status

**Table Name : Video\_mstr**

Description :This table is give details about video information.

<b>video_id</b>	Video id
<b>vid</b>	Vendor id
<b>sub_cat_id</b>	Sub category id
<b>vurl</b>	Video url
<b>vimage</b>	Video image

**Table Name : Voucher\_mstr**

Description :This table is give details about voucher information.

<b>voucher_id</b>	Voucher id auto generate
<b>voucher_name</b>	Voucher code
<b>min_amt</b>	Minimum amount for voucher
<b>discount</b>	Discount in percentage

**Table Name : Wish\_List\_mstr**

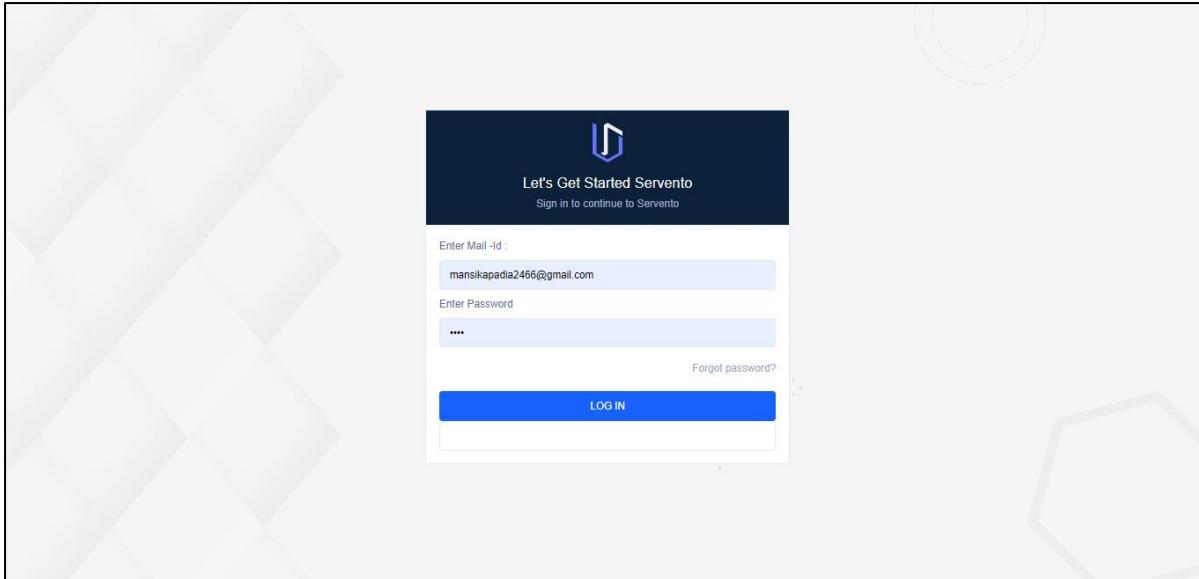

Description :This table is give details about WishList information.

<b>wid</b>	Wish List id auto generate
<b>uid</b>	User id
<b>sub_cat_id</b>	Sub category id
<b>vid</b>	Vendor id

## 3.6 User Interface & Coding

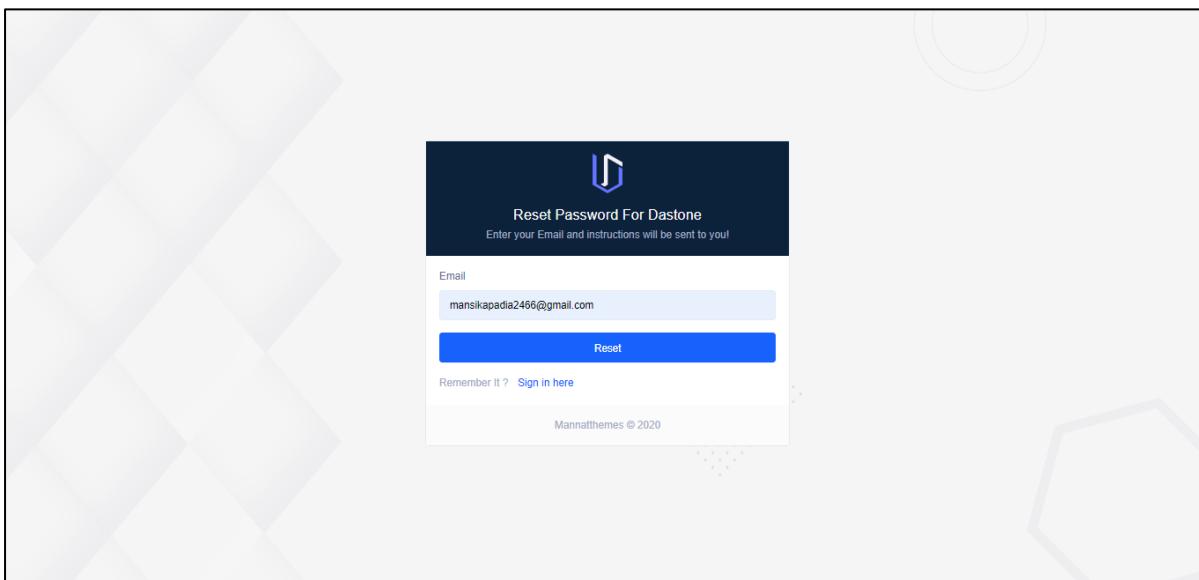

### Admin Side Interface

#### Admin Side Login Page :

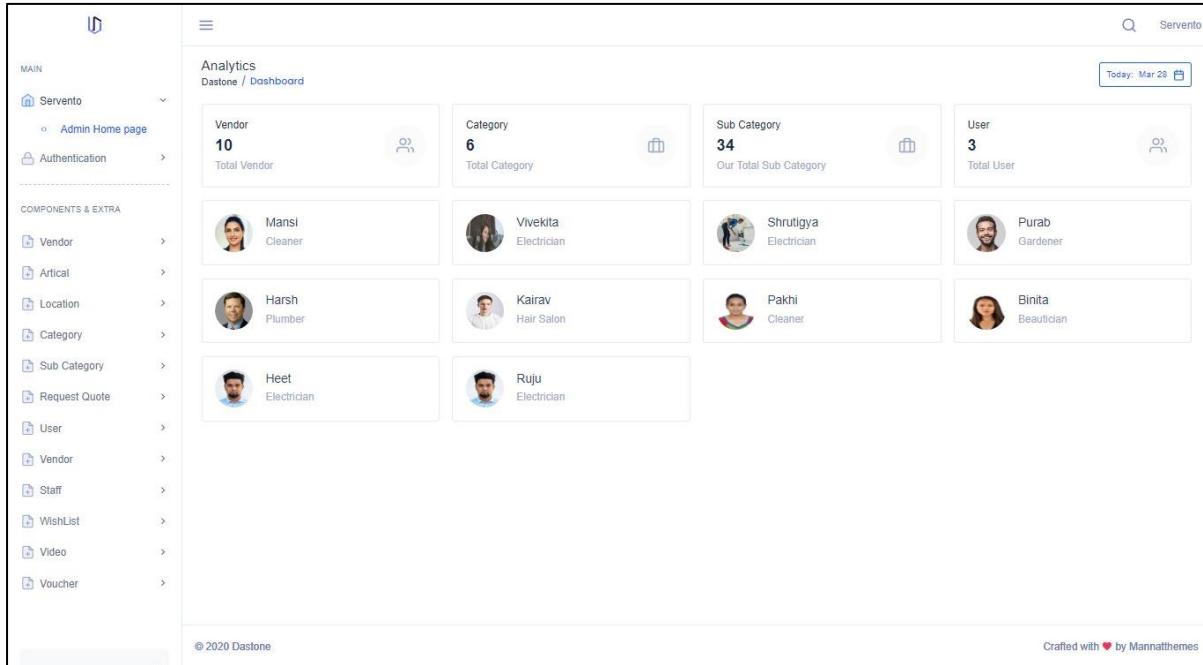

Description : This page is used for Admin Login.

#### Admin Side Reset Password :

Description : This page is used for if Admin Forgot Pass.

## Admin Dashboard :

The screenshot shows the Admin Dashboard with a sidebar on the left containing navigation links for Servento (Admin Home page, Authentication), Components & Extra (Vendor, Article, Location, Category, Sub Category, Request Quote, User, Vendor, Staff, WishList, Video, Voucher), and a footer copyright notice.

The main content area displays analytics for Dastone / Dashboard, including:

- Vendor:** 10 Total Vendor
- Category:** 6 Total Category
- Sub Category:** 34 Our Total Sub Category
- User:** 3 Total User

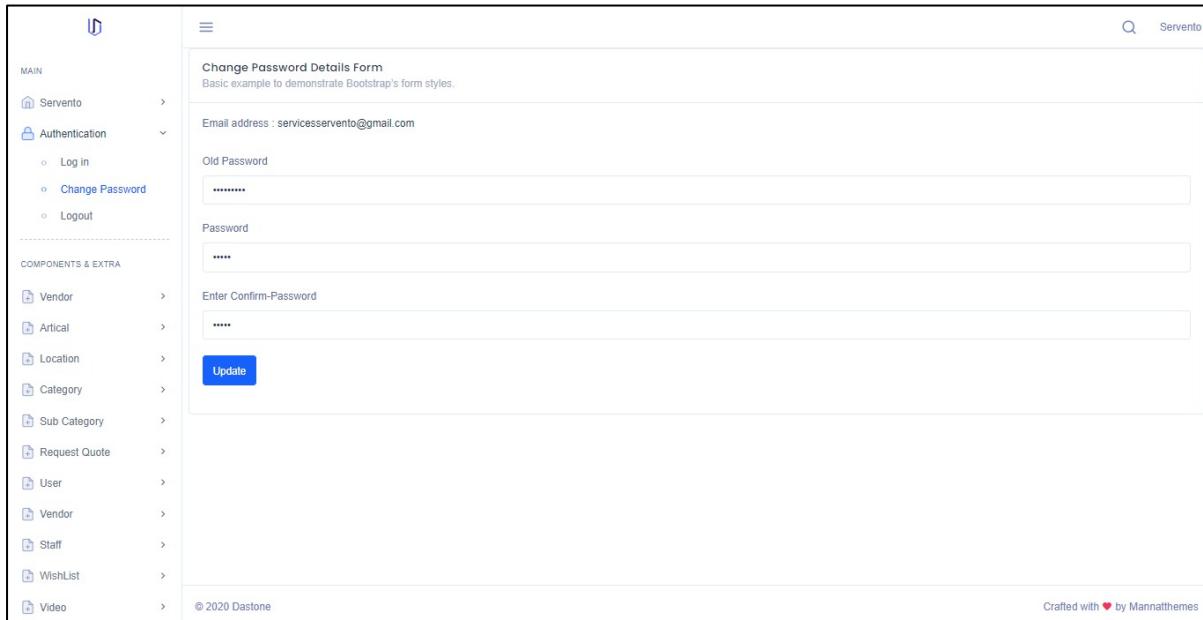

Below these statistics are eight user profile cards:

Profile	Name	Occupation
	Mansi	Cleaner
	Vivekita	Electrician
	Shrutigya	Electrician
	Purab	Gardener
	Harsh	Plumber
	Kairav	Hair Salon
	Pakhi	Cleaner
	Binita	Beautician
	Heet	Electrician
	Ruju	Electrician

At the bottom right, there is a note: "Crafted with ❤️ by Mannathemes".

Description : When admin login first page is open.

## Admin Change Password :

The screenshot shows the Admin Change Password form with a sidebar on the left containing navigation links for Servento (Log in, Change Password, Logout), Components & Extra (Vendor, Article, Location, Category, Sub Category, Request Quote, User, Vendor, Staff, WishList, Video), and a footer copyright notice.

The main content area displays the "Change Password Details Form" with fields for:

- Email address: servicesservento@gmail.com
- Old Password:  (containing four dots)
- Password:  (containing four dots)
- Enter Confirm-Password:  (containing four dots)

A blue "Update" button is located at the bottom left of the form area.

Description : If admin want to change password.

## Vendor List :

Description : It display all list of pending vendors.

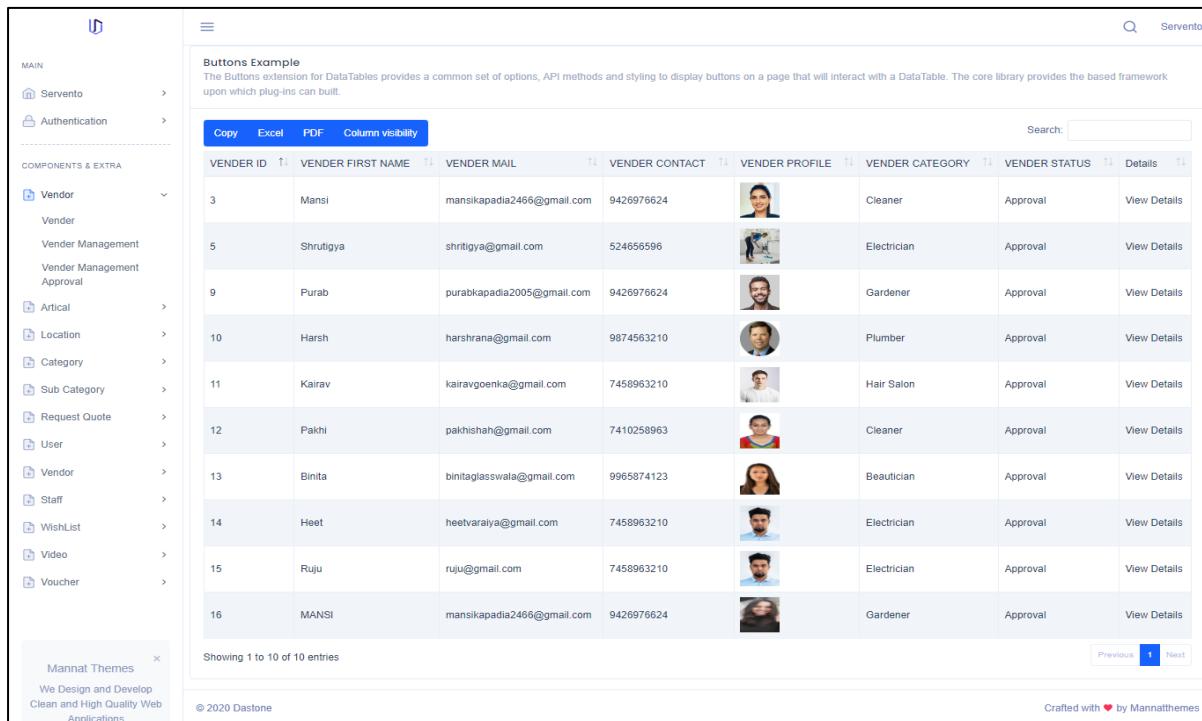

## Approve Vendor :

The screenshot shows a vendor profile for 'MANSI' (Gardener). The profile includes personal information such as First Name (MANSI), Last Name (kapadia), Email Address (mansikapadia2466@gmail.com), Password (1234), Address (akashera), Select State (Gujarat), Select City (Surat), and Contact Phone (9426976624). A vendor profile picture is displayed, and the vendor description is 'Gardening services'. There is a checkbox for 'Approval' which is checked, and a 'Confirm' button below it.

**Description : View profile and then Approve Vendor.**

## List of Approve Vendors :

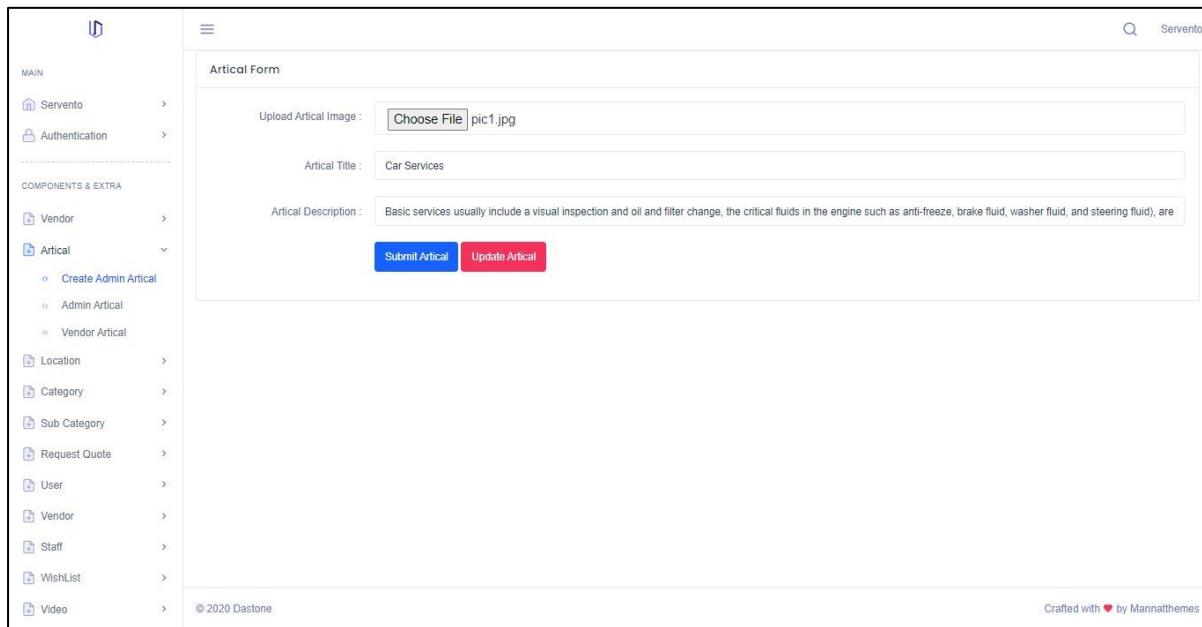

The screenshot shows a table of approved vendors. The columns include VENDOR ID, VENDOR FIRST NAME, VENDOR MAIL, VENDER CONTACT, VENDER PROFILE, VENDER CATEGORY, VENDER STATUS, and Details. The table lists 16 entries, each with a vendor name, email, contact number, profile picture, category (e.g., Cleaner, Electrician, Gardener, Plumber, Hair Salon, Beautician), status (Approval), and a 'View Details' link. The first entry is Mansi.

VENDOR ID	VENDOR FIRST NAME	VENDER MAIL	VENDER CONTACT	VENDER PROFILE	VENDER CATEGORY	VENDER STATUS	Details
3	Mansi	mansikapadia2466@gmail.com	9426976624		Cleaner	Approval	<a href="#">View Details</a>

**Recent News Articles**

- carpenter**  
Construct and install building frameworks, including walls, floors, and doorframes. Respect and replace damaged framework or other structures and fixtures. Instruct and direct workers and other construction helpers.
- AC Repairer**  
The AC Repair process is essentially the process of restoring an air conditioner to working condition. Unlike some other services, there is no unique approach to service; the general method involves inspecting the various components of the system, servicing what needs servicing and performing any repairs that are deemed necessary.
- Painter**  
Painters apply paint, stain, and coatings to walls and ceilings, buildings, large machinery, and equipment, and bridges and other structures.
- Roofing**  
For minor leaks and holes, the roofer will repair the damage by applying a patch to seal the damaged area. Alternatively, the roofer may use a specially-designed glue to repair small holes or cracks. Larger repairs often require replacing an entire section of rubber roofing and resealing the seams.
- Car Services**  
Basic services usually include a visual inspection and oil and filter change, the critical fluids in the engine such as anti-freeze, brake fluid, washer fluid, and steering fluid, are topped up.

Description : Home Page of User Side.

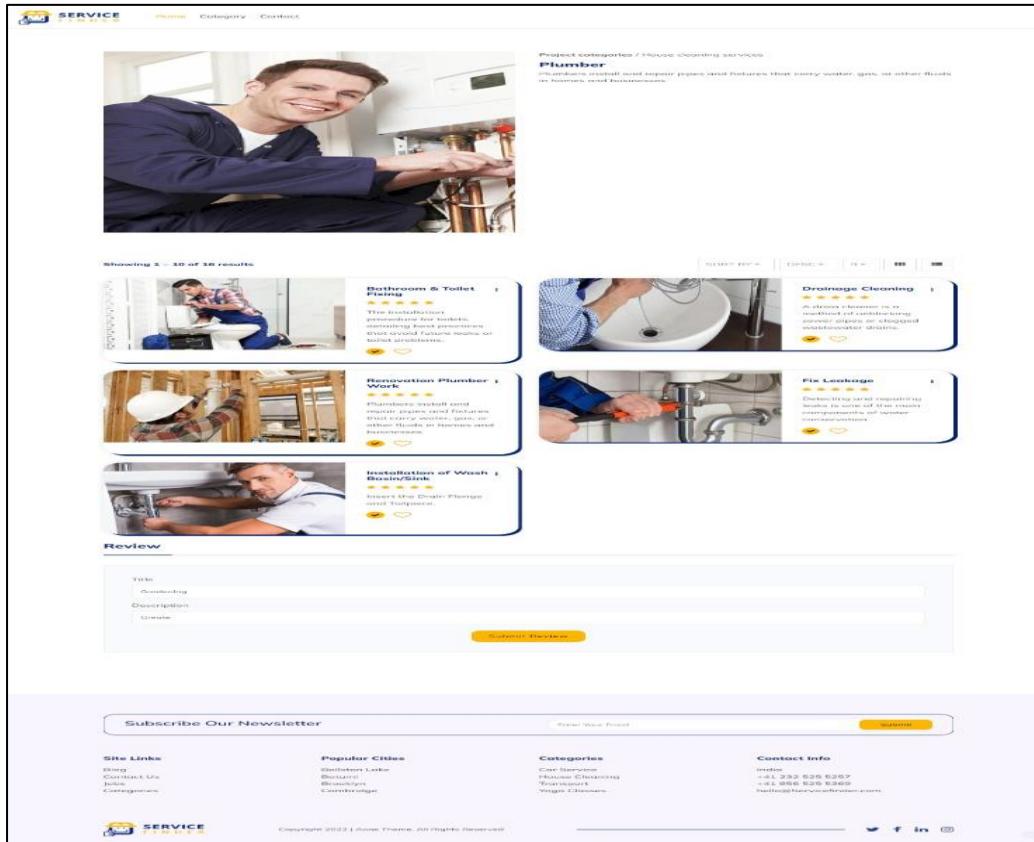

## User Profile :

The screenshot shows the 'Edit Profile' section of the Service Finder app. On the left sidebar, there are links for 'My Account', 'HOME', 'MY WISHLIST', 'MY BOOKING', and 'CHANGE PASSWORD'. The main area is titled 'Edit Profile' and contains a sub-section 'About me'. It shows the 'Username' field with 'Mansi Kapadia', the 'Email' field with 'mansikapadia2466@gmail.com', and the 'Contact No' field with '9426976624'. A yellow 'UPDATE' button is at the bottom.

Description : It will display User profile.

## Display SubCategory :

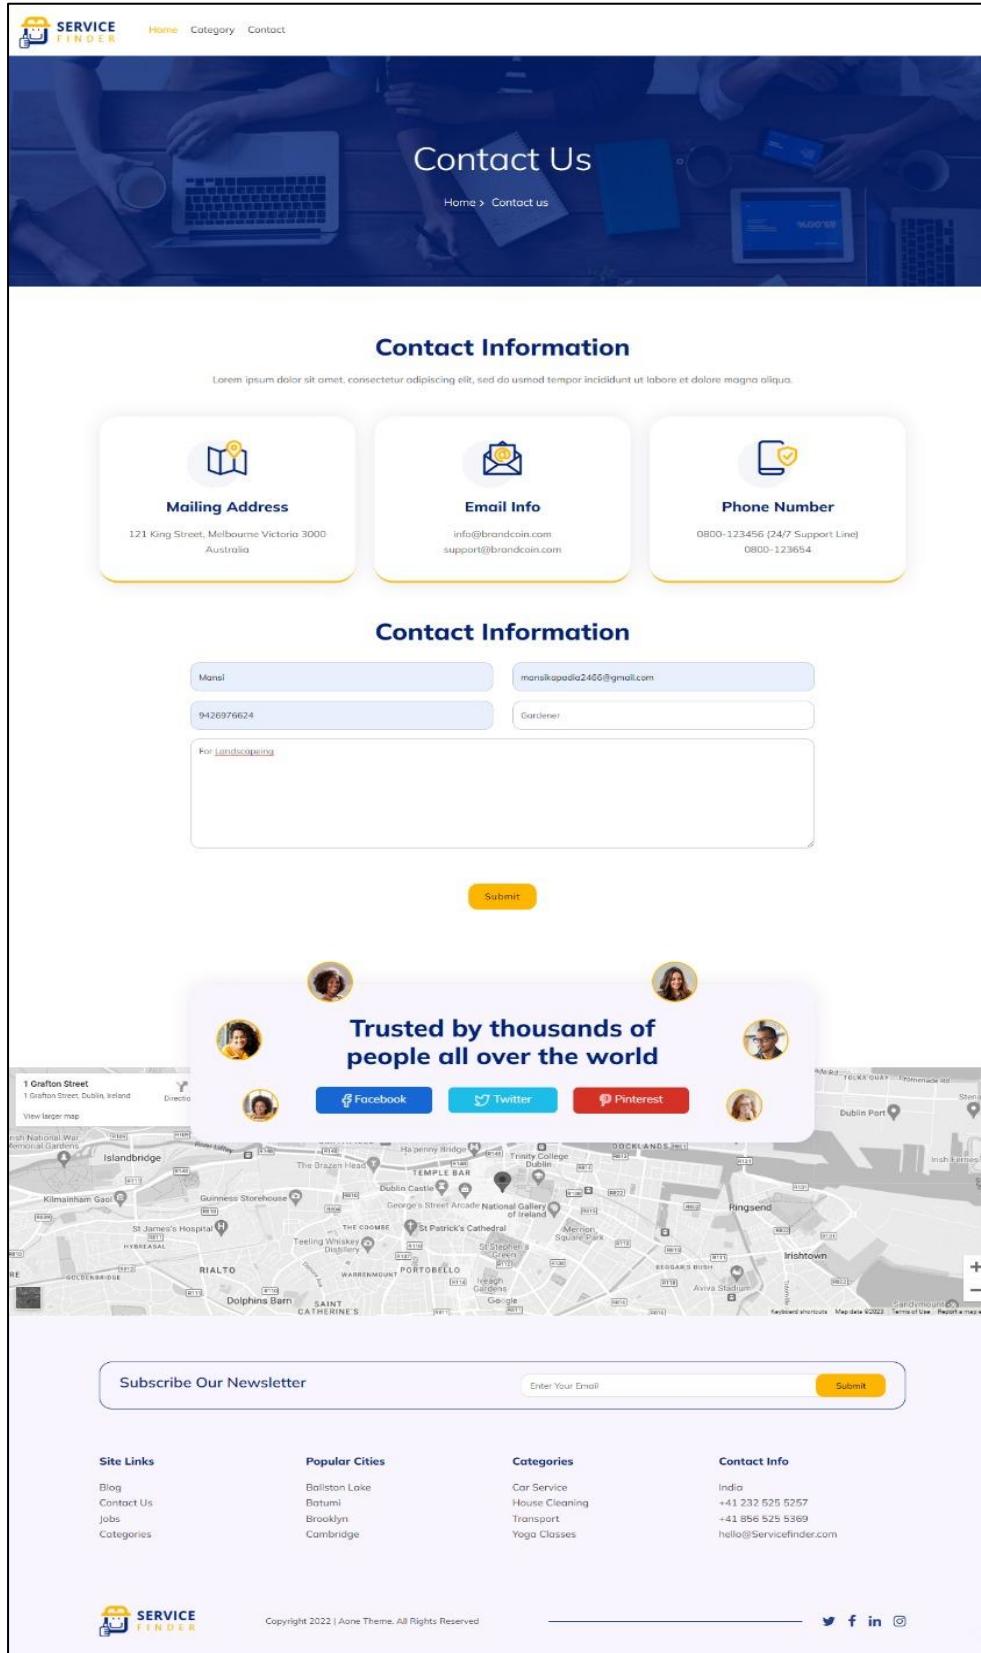

The screenshot shows the 'Plumber' service category page. At the top, there's a large image of a plumber working on pipes. Below it, a heading says 'Project categories 7 House cleaning services' and 'Plumber'. It states that plumbers install and repair pipes and fixtures that carry water, gas, or other fluids in houses and businesses. Below this, there are five cards showing subcategory images and descriptions:

- Bathroom & Toilet**: Shows a plumber working on a toilet. Description: Fixing leaky toilets, installing bidet fixtures, repairing tank problems, and solving clogs.
- Drainage Cleaning**: Shows a person cleaning a drain. Description: An efficient process of unclogging drains using specialized equipment.
- Fix Leaks**: Shows a person fixing a leak. Description: Eliminating water damage by sealing cracks and openings of water pipes.
- Renovation Plumber**: Shows a plumber working on a wall. Description: Plumbers install and repair pipes and fixtures in new buildings or during renovations.
- Installation of Wash Basin/Sink**: Shows a person installing a sink. Description: Inserting the Drain Flange and Hanger.

At the bottom, there's a 'Review' section and a 'Subscribe Our Newsletter' form. The newsletter form includes fields for 'Topic', 'Email Address', and 'Subscribe'.

Description : Use for Display all subcategory and services.

## User Order Details :

The screenshot shows a web application interface titled "Service Finder Template | Dashboard". On the left, there is a sidebar with links: "My Account", "HOME", "MY PROFILE", "MY WISHLIST", "MY BOOKING", and "CHANGE PASSWORD". The main content area is titled "My Booking" and displays a table of bookings. The table has columns: "Booking Info", "Sub Category Name", and "Sub Category Price". There are two entries: "Terrace Gardening" at 1500 and "3-D Makeup" at 3000. Below the table, it says "Showing 1 to 2 of 2 entries". At the bottom right, there are "Previous" and "Next" buttons.

**Description : User can see its particular order details.**

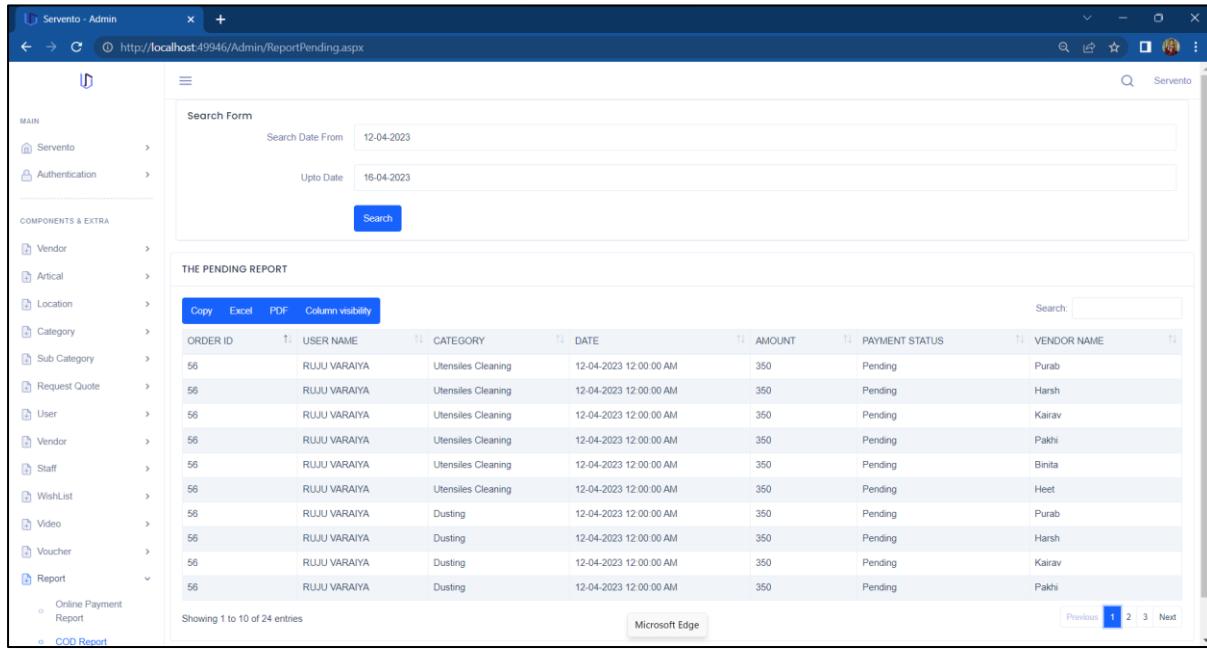

## Report of Net Banking :

The screenshot shows a web application interface titled "Servento - Admin". The left sidebar includes "MAIN" (Servento, Authentication), "COMPONENTS & EXTRA" (Vendor, Artical, Location, Category, Sub Category, Request Quote, User, Vendor, Staff, WishList, Video, Voucher, Report), and "Report". The main content area has a "Search Form" with fields for "Search Date From" (14-04-2023) and "Upto Date" (15-04-2023), and a "Search" button. Below this is a section titled "THE SUCCESS REPORT" with a table. The table has columns: ORDER ID, USER NAME, CATEGORY, DATE, AMOUNT, PAYMENT STATUS, and VENDOR NAME. It lists six entries for "RUJU VARAIYA" under "Tarrace Gardening" with amounts from 1500 to 3000 and payment status "Success". Below the table, it says "Showing 1 to 6 of 6 entries". At the bottom right, there are "Previous" and "Next" buttons.

**Description : Report of Net Banking order.**

Description : Report of cash payment orders.

## Testing

### 4.1 Unit Testing

- A unit is the smallest testable part of software. It usually has one or a few inputs and usually a single output.
- In procedural programming a unit may be an individual program, function, procedure, etc.
- In object-oriented programming, the smallest unit is a method, which may belong to a base/super class, abstract class or derived/child class.
- Some treat a module of an application as a unit. This is to be discouraged as there will probably be many individual units within that module.
- Unit testing is the first level of testing and is performed prior to **Integration Testing**.
- Unit Testing is normally performed by software developers themselves or their peers. In rare cases it may also be performed by independent software testers.

## 4.2 Integration Testing

- Integration testing is the second level of the software testing process comes after unit testing. In this testing, units or individual components of the software are tested in a group. The focus of the integration testing level is to expose defects at the time of interaction between integrated components or units.
- [Unit testing](#) uses modules for testing purpose, and these modules are combined and tested in integration testing. The Software is developed with a number of software modules that are coded by different coders or programmers. The goal of integration testing is to check the correctness of communication among all the modules.
- Once all the components or modules are working independently, then we need to check the data flow between the dependent modules is known as integration testing.

## Guidelines for Integration Testing

- We go for the integration testing only after the functional testing is completed on each module of the application.
- We always do integration testing by picking module by module so that a proper sequence is followed, and also, we don't miss out on any integration scenarios.
- First, determine the test case strategy through which executable test cases can be prepared according to test data.
- Examine the structure and architecture of the application and identify the crucial modules to test them first and also identify all possible scenarios.
- Design test cases to verify each interface in detail.
- Choose input data for test case execution. Input data plays a significant role in testing.
- If we find any bugs then communicate the bug reports to developers and fix defects and retest.
- Perform **positive and negative integration testing**.

## 4.3 System Testing

- System Testing includes testing of a fully integrated software system. Generally, a computer system is made with the integration of software (any software is only a single element of a computer system). The software is developed in units and then interfaced with other software and hardware to create a complete computer system. In other words, a computer system consists of a group of software to perform the various tasks, but only software cannot perform the task; for that software must be interfaced with compatible hardware. System testing is a series of different type of tests with the purpose to exercise and examine the full working of an integrated software computer system against requirements.
  - To check the end-to-end flow of an application or the software as a user is known as System testing. In this, we navigate (go through) all the necessary modules of an application and check if the end features or the end business works fine, and test the product as a whole system.
  - It is end-to-end testing where the testing environment is similar to the production environment.
  - There are mainly two widely used methods for software testing, one is White box testing which uses internal coding to design test cases and another is black box testing which uses GUI or user perspective to develop test cases.
  - White box testing
  - Black box testing
  - System testing falls under Black box testing as it includes testing of the external working of the software. Testing follows user's perspective to identify minor defects.
- 
- **System Testing includes the following steps.**
  - Verification of input functions of the application to test whether it is producing the expected output or not.
  - Testing of integrated software by including external peripherals to check the interaction of various components with each other.
  - Testing of the whole system for End-to-End testing.
  - Behaviour testing of the application via a user's experience

## Conclusion

- Technology has made significant progress over the years to provide consumers a better online service experience and will continue to do so for years to come. With the rapid growth of service and brands, people have speculated that online shopping will overtake in-store shopping.
- While this has been the case in some areas, there is still demand for brick-and-mortar stores in market areas where the consumer feels more comfortable seeing and touching the services being bought. However, the availability of online service has produced a more educated consumer that can shop around with relative ease without having to spend a large amount of time.
- In exchange, online services have opened up doors to many small retailers that would never be in business if they had to incur the high cost of owning a brick-and-mortar store. At the end, it has been a win-win situation for both consumer and sellers.
